Shaoliang Yang

Curriculum Vitae

Ph.D. Candidate, Mechanical Engineering, Santa Clara University
Expected graduation: June 2027 · Advisor: Prof. Jun Wang
syang11@scu.edu
nbbllxx0.github.io · github.com/nbbllxx0 · Google Scholar

Research Interests

Generative design; topology optimization; isogeometric analysis; NURBS geometric modeling; LLM agents for design automation; GPU-accelerated FEA/SIMP; architected materials; ML for mechanical engineering.

Education

Ph.D., Mechanical Engineering, Santa Clara University 2023 – present
Advisor: Prof. Jun Wang; Expected June 2027; GPA 3.76/4.00

M.Eng., Control Theory and Control Engineering, Yunnan University 2020 – 2023
Three-year academic (research-track) master's; thesis-based, advisor: Prof. Dongming Zhou. Assessed by WES as equivalent to a U.S. master's degree.

B.E., Automation, Kunming University of Science and Technology 2014 – 2018

Teaching Experience

Grader, MECH 45 Applied Programming for Mechanical Engineers (Sections 1 & 3) Spring 2025
Santa Clara University — assignment feedback and assessment for undergraduate ME programming.

Guest Lecturer (2 hours), Computational Geometry for CAD/CAM
Santa Clara University — lecture connecting geometric representations to CAD/CAM practice.

Research Experience

Research Assistant, Santa Clara University (Prof. Jun Wang) 2023 – present

- Generative/inverse design for curves, surfaces, and 3D architected cellular materials (NURBS-OT, parametric autoencoders, CH-WGAN, SDF reconstruction).
- LLM-driven controllers for SIMP topology optimization (AutoSiMP; adaptive continuation).
- Matrix-free GPU kernels and multigrid solvers for large-scale 3D SIMP systems; NURBS synthesis coupled with IGA.

Graduate Researcher (M.Eng. thesis), Yunnan University (Prof. Dongming Zhou) 2020 – 2023

- Three-year research-track master's devoted to thesis research rather than coursework: deep generative models for low-light image enhancement and denoising.
- First author on three journal papers from this work — *IEEE Trans. Computational Imaging*, *IEEE Signal Processing Letters*, and *Int. J. Machine Learning and Cybernetics*.

Teaching Preparation

Ready to teach: engineering programming; CAD/computational geometry; engineering design; intro FEA; engineering mathematics; graduate FEM; topology optimization / generative design; applied ML for design; IGA.
Relevant coursework: MECH 251/252 (FEM), MECH 415 (Optimization in Mech. Design), MECH 257 (Simulations & Modeling), MECH 259 (Design with Applied ML), MECH 294 (Design & Manufacturing), MECH 200/AMTH 201 (Adv. Eng. Math), AMTH 256 (Graph Theory), MECH 323 (Modern Control).

Skills

Python, PyTorch, MATLAB, GPU/matrix-free solvers, LaTeX; generative models; SIMP/TO; IGA/NURBS; FEA (incl. COMSOL experience); SolidWorks/CAD; Docker.

Awards & Funding Participation

China National Scholarship (Ministry of Education), 2022.
National Science Foundation (NSF) PD 22-8084 Computational and Data-Enabled Science and Engineering (CDS&E) funding opportunity through award #2245299 (research participation with Prof. Jun Wang, Santa Clara University).
NSFC Grants 62066047 & 61966037; Yunnan Key Laboratory Construction funding (with Prof. Zhou), 2020–2023.

Professional Service

Journal reviewer, *Structural and Multidisciplinary Optimization* (Springer), 2026.

Journal reviewer, *Journal of Computing and Information Science in Engineering*, 2025–2026; *Journal of Manufacturing Science and Engineering*, 2026; *Journal of Mechanical Design*, 2026; *The Imaging Science Journal*, 2025–2026; *Scientific Reports*, 2026; *Discover Internet of Things*, 2026.

Conference reviewer, ASME IDETC/CIE, 2025–2026.
